CoroDrill® 860 with -GM geometry: High-performance in challenging operations

Featuring a new grade, innovative flute design and a multi-layer PVD-coated tip, CoroDrill® 860 with -GM geometry is a high-performance optimized drilling solution for short holes primarily in steel, stainless steel, cast iron and hardened materials. It also performs competitively in HRSA and non-ferrous materials such as aluminium. Ideal for automotive and general engineering applications.

Upgraded turning tools: CoroTurn® TR and CoroTurn® 107

With CoroTurn® TR and CoroTurn® 107 tools for external turning are now upgraded with Coromant Capto® tool holders, featuring through-tool delivery of precision coolant from machine to cutting edge. CoroTurn® TR is first choice for external profiling in all materials, while CoroTurn® 107 is used for external turning of slender components in all materials.
