## Gain an edge in steel turning

Struggling to make your steel turning efficient and productive? Try Sandvik Coromant's new steel turning grades GC4425 and GC4415 which are enhanced in every aspect, from tool life to wear and heat resistance. GC4425 delivers improved wear resistance, heat resistance and toughness, significantly expanding the application range. Grade GC4415 complements GC4425 with enhanced performance when more heat resistance is needed. It allows for high cutting speed and long times in cut when machining in stable conditions. A perfect productivity pair delivering an unbeatable performance in steel applications.

Discover GC4425 & GC4415

## CoroMill® Plura Gannet: optimized for plunging in HRSA

New CoroMill® Plura Gannet is designed for tough HRSA materials primarily used in aerospace and oil and gas industries. Ideal for machining components such as blisks and impellers. Equipped with the excellent wear-resistant 1610 grade, which is optimized for plunging in HRSA, the solid end mill offers excellent productivity and high process security with longer tool life.

## CoroMill® Plura HFS 5xD: designed for pocketing in titanium

CoroMill® Plura HFS 5xD is a new solid end mill dedicated for titanium pocketing. With length up to 5xD, this end mill allows you to machine pockets in a single high feed side milling step, avoiding mismatch, saving time and increasing productivity. Featuring the innovative 'Form control' design, the end mill is ideal for machining high, thin walls in a stable manner without any bending.
