### FEATURES & BENEFITS

- Versatile choice for steels and cast irons
- Also suitable for stainless steels, super alloys and hardened steels
- New milling grade with nanolayered PVD coating
- Added to more than 90 different types of inserts
- Compared with 8230 it offers **GREATER**
  - Resistance to heat-related cracks
  - Wear resistance
  - Toughness and impact strength
- **Versatility** – suitable for finishing to roughing even in unfavorable conditions
- **Reliability and high performance** when machining with and without coolant
- **High durability** machining steels with medium-high cutting speeds
- **Easy to use** - gold surface finish to help visually monitor wear progression
